

RIPACK 3000 +
FAST, POWERFUL AND ERGONOMIC

The Ripack 3000 + is the new Ripack innovation. The association of the flagship product, the Ripack 3000 with the S33 short lance, will provide you with optimal ergonomics allowing the reduction of Musculoskeletal Disorders (MSD) which can be caused by repetitive bending and stretching during intensive work.

Get precision work, especially with the Ripack technology of short and rigid flame. Its 360° rotating nozzle remains removable. Its new enlarged combustion, with a wider heating zone, saves you working time.

Equipped with a Securipack regulator, this gun allows you to benefit from a high level of safety and also an optimal level of performance. Its adjustable power from 45 to 80 kW makes it possible to adapt to any thickness of shrink film.

TECHNICAL SPECIFICATIONS

Power	153 000 to 272 000 btu/h
Pressure	21 to 50 PSI
Gas consumption	from 6,75 to 11,9 lbs/h
Length/Height	14.7/10.3 inches
Package dimensions	18.1x12.9x5.5 inches
Weight	3.4 lb
Package weight	11.7 lb
Noise level	< 85 dbA
Energy source	Propane gas or natural gas upon request
Available extensions	12.9, 34.2, 38.9, 47.2, 73.6 inches
